

I believe it is in the public interest to preserve FM translator service. While LPFM stations may be beneficial for some, LPFM stations should not replace national & regional radio broadcasts using FM translators.

Where I live, in Southern Oregon, many people enjoy listening to K-LOVE radio. K-LOVE originates in Sacramento, California and is broadcast to many locations across the United States through FM translators.

Two K-LOVE frequencies are available in my area, 88.7 & 96.5 FM.
